5- Variable K -Map

The structure of such a K-Map for SOP expression is given below :

ST \ QR	00	01	11	10
00	0	1	3	2
01	4	5	7	6
11	12	13	15	14
10	8	9	11	10

P=0

F(P,Q,R,S,T)

ST \ QR	00	01	11	10
00	16	17	19	18
01	20	21	23	22
11	28	29	31	30
10	24	25	27	26

P=1

Minimization of Boolean Expression by 5 Variable K-Map (SOP form)

I. Solving SOP function -

For clear understanding, let us solve the example of SOP function minimization of 5 Variable K-Map using the following expression :

$$\sum m(0, 2, 4, 7, 8, 10, 12, 16, 18, 20, 23, 24, 25, 26, 27, 28)$$

$$F(PQRST) = S'T' + Q'RST + PQR' + R'T'$$

Minimization of Boolean Expression by 5 Variable K-Map (POS form)

II. Solving POS function -

Now, let us solve the example of POS function minimization of 5 Variable K-Map using the following expression :

$$\prod M(0, 2, 4, 7, 8, 10, 12, 16, 18, 20, 23, 24, 25, 26, 27, 28)$$

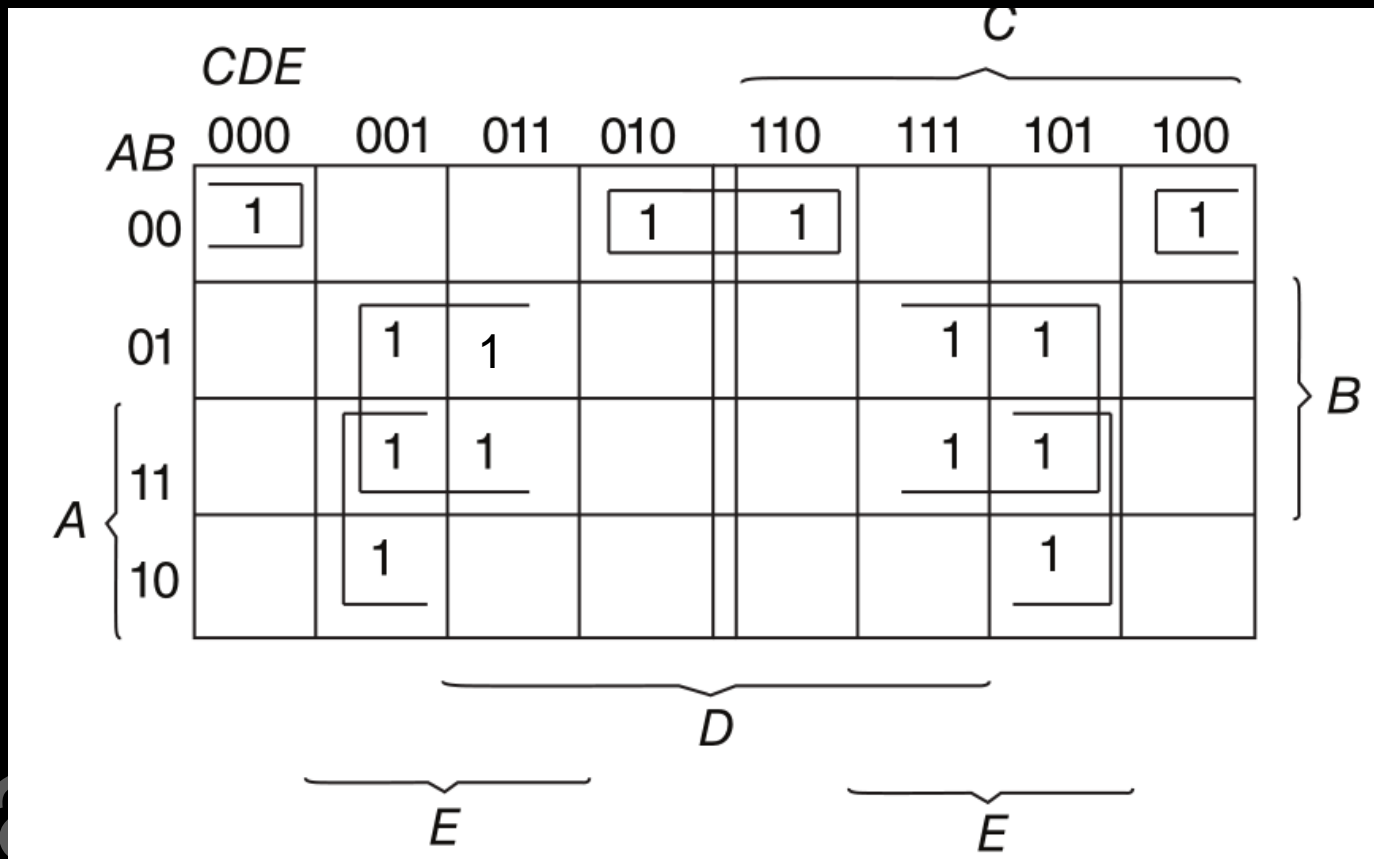

$$f(PQRST) = (S+T) \cdot (R+T) \cdot (Q+R'+S'+T') \cdot (P'+Q'+R)$$
